Spark Plug Award: Philip
Pacquette

Thank you to all the members who attended and participated in the meeting!

Philip Pacquette presented his 6th speech, Legal & Illegal Drugs. He discussed the problems that come as a result of prolonged drug use and listed warning signs we can see that might indicate someone is on drugs. These warning signs included a person suddenly changing his whole group of friends, someone wanting to be alone all the time and a person with a runny nose for no reason. Thank you for your speech, Philip!

Peter Taylor was our 2nd speaker. His talk, entitled An Inconsistent Journey Through Aging, took us from his childhood acceptance of his age to his teen years of wanting to be older so he could do what the older teens were doing. In the 20s came a conflicting old & young feeling- finally been out of the teens but at the same time being at the bottom of the rung at the workplace. After years spent working Peter realized he was now a Senior Staff at his work – a position that seemed so far away when he first joined the company. Now he is in the position to be a mentor to those just coming into the workplace and share his knowledge and experience with those just starting out.

Tip of the Week

Make gestures convincing. Every hand gesture should be total body movement that starts from the shoulder – never from the elbow. Half-hearted gestures look artificial. (from Toastmasters International)
